

Adulteration and Fraud of Botanical and Natural Health Ingredients: Issues, Challenges and Prevention Tools for the Industry

Marriott Hotel, Frankfurt, Germany - November 29-30, 2018,
Easy to combine with Health & Nutrition Week and HI Europe

Workshop Overview

Adulteration and fraud of natural ingredients added to foods are global concerns for stakeholders, for industry, for risk assessors and risk managers, and for EU consumers. What is the EU industry doing about it? What are the plans of regulators? What lessons can be learnt and tools used from leading experts. How can adulteration and fraud be prevented? And what happens when it is discovered?

Workshop Objectives:

Obtain insights into the problem and what is being done globally to prevent adulteration; Hear the views and plans of regulators and risk assessors; Identify tools and practices for prevention; Learn through case studies about health risks, and impacts of natural ingredient fraud; Participate to panel discussion with experts; Work with experts on real case-studies in the practice lab.
